

Job Title: Second Row Seat Assist

Job Description: A load assist was needed to ~~pick~~^{transfer} a second row seat (60/40 Split)/(Full Bench) from the build line to the shipping pallets.

Solution: P.E. designed, built and installed a load assist device that would work with both models. This particular assist was a grip tool with the options of pitching 60° and shifting center of Gravity. This system was a Jib Boom (JB1) with a 300 pound pneumatic balancer.
